

Rice

Rice

Introduction

Our 1885 rice pattern was originally produced by Yale and Towne Co. of Stamford, CT. We offer the entire collection in bronze. Each piece is finished by hand using the same techniques of over 125 years ago.

Noteworthy is the extensive use of details. The reverse side of the doorknobs, cabinet knobs and the reveal of hinges are all covered in grains of rice.

Hinges are made the traditional way with removable ball tipped pins and opposing ball finials that unscrew.

Mortise locks, pocket door locks and even our modern entry mortise locks have matching rice designs on the lock fronts and strike plates.

This series is compatible with tubular latches and traditional mortise locks.
